GIVE NEW INSIGHTS INTO LOGISTICS

INSIGHT MESSAGE >

“Insight shipping, inc DBA Insight Logistics” was established by an investment. Insight team members with 15+ years of logistics experiences ensure best solutions for clients, vendors and oversea agents. Our company will give our clients new insights, bringing new possibility, opportunity, value, and sustainability into logistics.

As Information Technology (IT) is at the forefront of a fast-paced logistics industry, we also participate in digital logistics for continuous growth of our business. At the same time, we meet customer expectations by means of both digital and analog follow up system. Through coexistence of digital and analog system, we emphasize that “Humanity” is our top priority, which contributes to customer’s satisfaction and our core value.

“Give new insights into logistics”

MISSION >

To become a leader in global logistics, we continuously enhance service quality, foster innovation, and gain insights to deliver new value. Through these efforts, we aim to achieve sustainable growth alongside our customers.

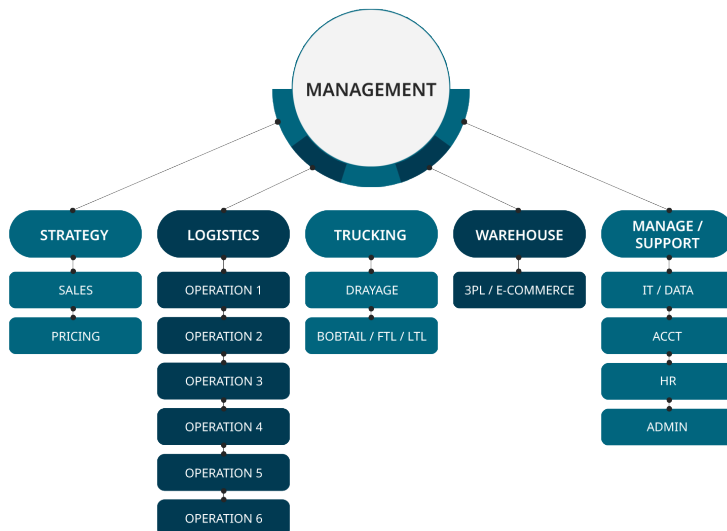

VISION >

We offer customers optimal routes and competitive rates with our expertise and knowledge. We aim to achieve customer satisfaction and differentiation through optimized systems and comprehensive logistics services.

- Storage and Inventory Management
- Order Fulfillment
- Shipping and Delivery
- Returns Processing
- Technology Integration
- Scalability
- Customization

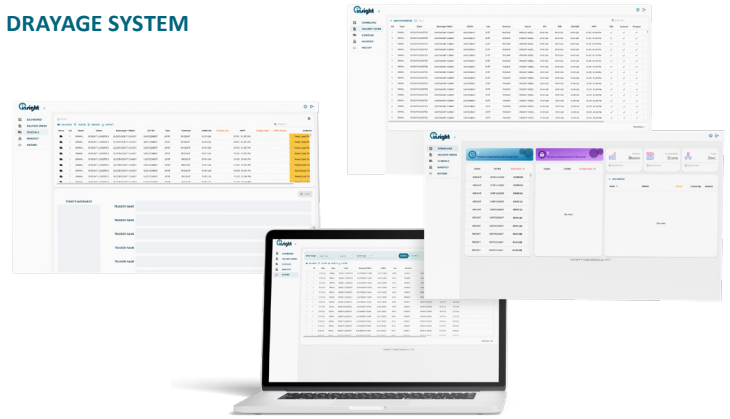

INFORMATION TECHNOLOGY >

Insight Logistics has been pursuing various IT resources to adapt to the rapidly changing trends in logistics.

From operations systems, drayage systems, and pricing systems to smart systems designed to make tracking our customers' valuable cargo easier, our various systems will become insightful tools to increase work efficiency and accuracy, while uncovering key insights in cargo movement.

Accumulated data from years of providing quality services, empowered by our latest data mining techniques, will inspire you with new insights into logistics.

DRAYAGE SYSTEM

SMART SYSTEM TRACKING + WMS

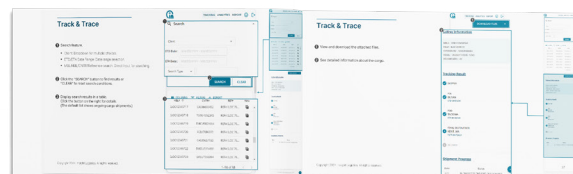

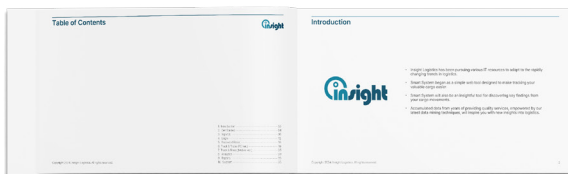

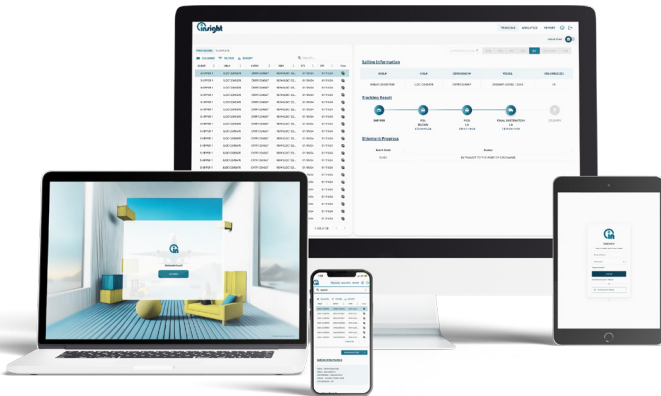

Our self-developed tracking software solution and Warehouse Management System help manage and track the movement of your goods throughout the supply chain.

These systems provide real-time visibility into the status and location of shipments, allowing businesses to efficiently monitor inventory and status.

SMART SYSTEM DATABASE

Leveraging an expansive and meticulously structured database enhances operational efficiency and informed decision-making for our clients.

Through adept management of internal databases, Insight offers sophisticated visualization tools within logistics, facilitating the presentation of graphical data for incisive, data-driven decisions.

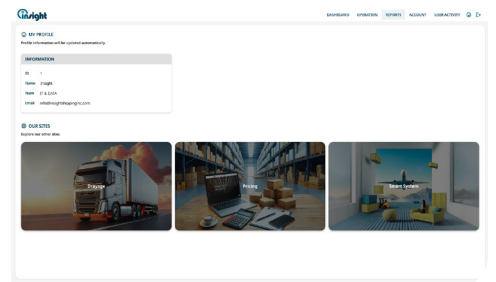

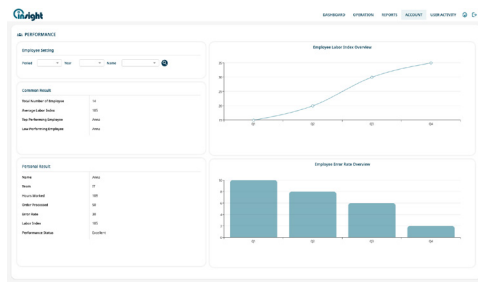

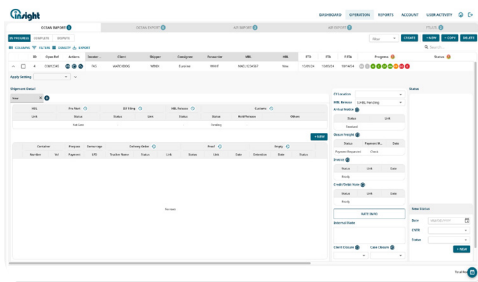

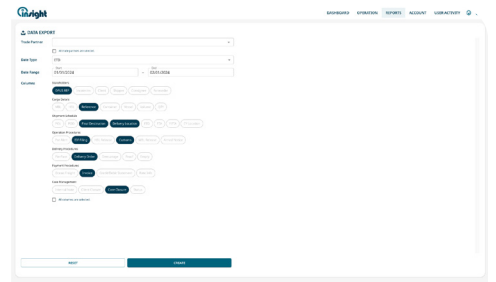

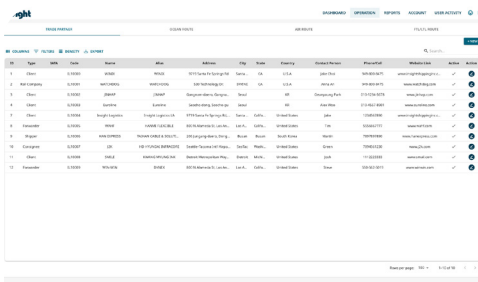

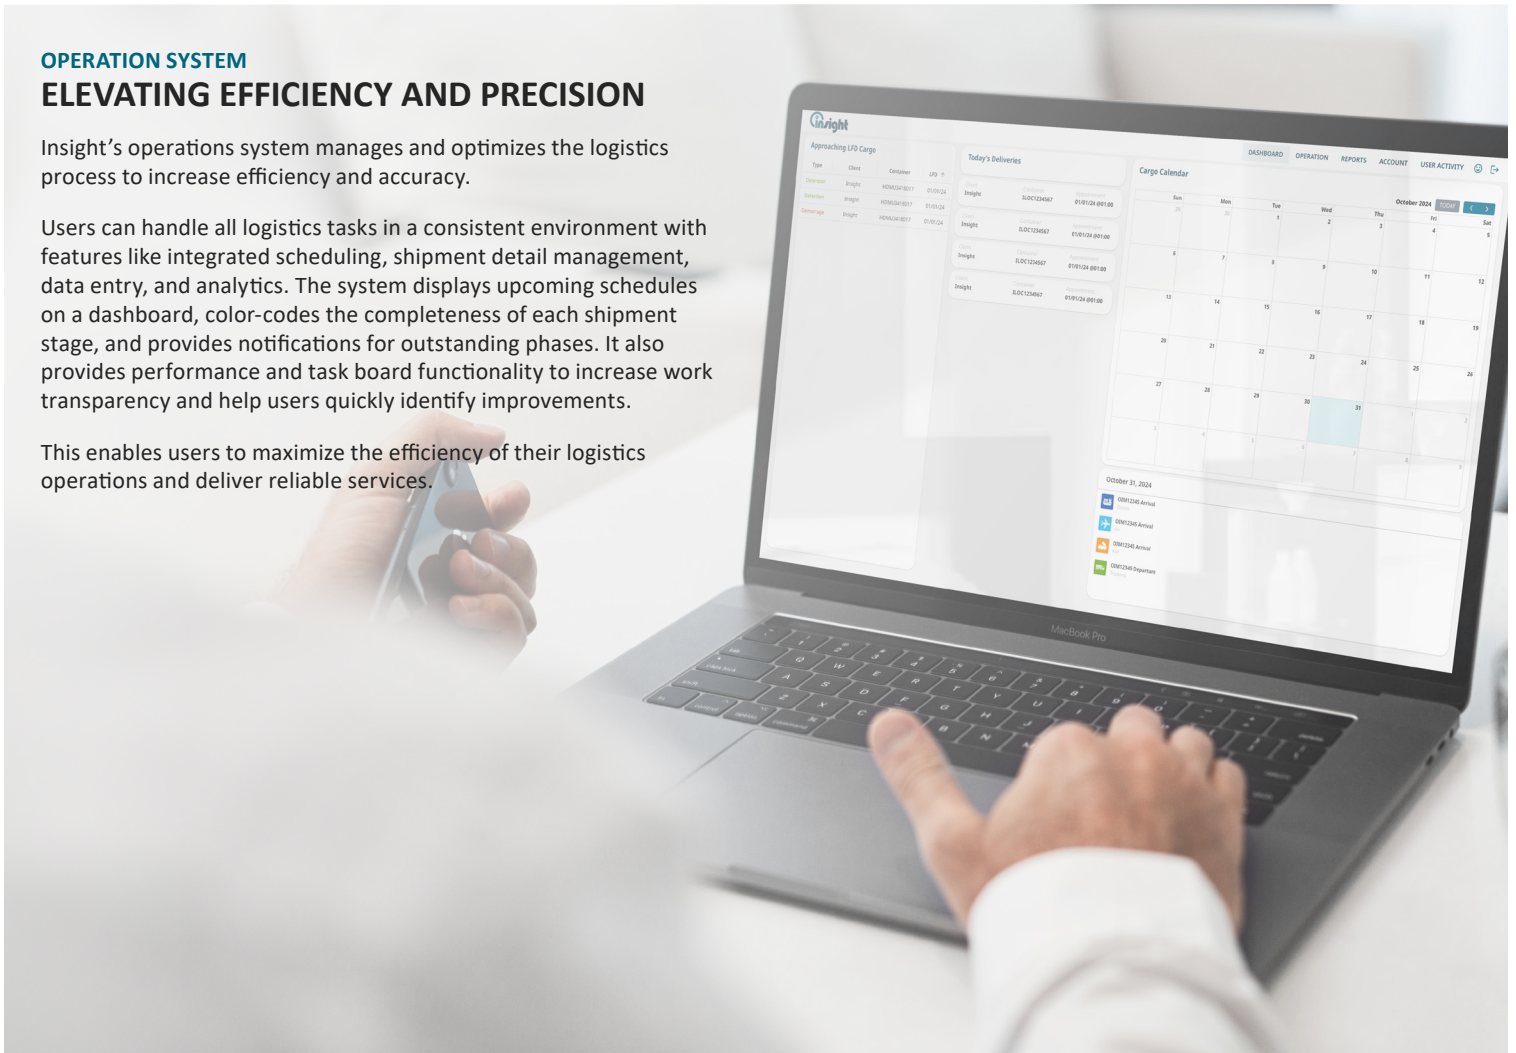

OPERATION SYSTEM ELEVATING EFFICIENCY AND PRECISION

Insight's operations system manages and optimizes the logistics process to increase efficiency and accuracy.

Users can handle all logistics tasks in a consistent environment with features like integrated scheduling, shipment detail management, data entry, and analytics. The system displays upcoming schedules on a dashboard, color-codes the completeness of each shipment stage, and provides notifications for outstanding phases. It also provides performance and task board functionality to increase work transparency and help users quickly identify improvements.

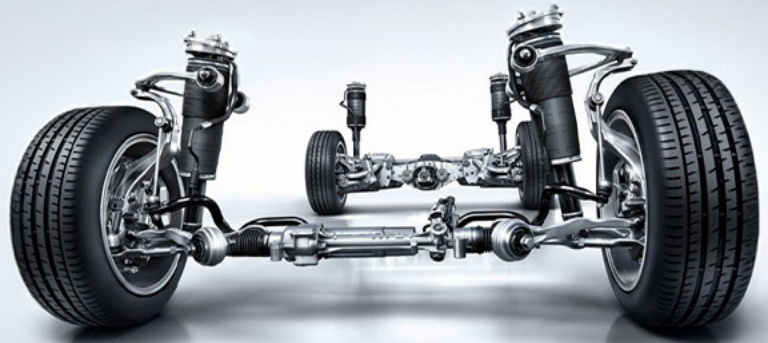

This enables users to maximize the efficiency of their logistics operations and deliver reliable services.

1 AUTO PARTS

With a full understanding of the various risks associated with this commodity, we offer customized solutions to offer the best possible lead time in the overall logistics process for our clients.

Our automotive team consults with the customers to conduct risk analyses that forecast possible scenarios and eliminate potential risks ahead of time.

2 GARMENT & CLOTHING

With full expertise in garment handling, our dedicated professionals provide Full logistics services from Ocean, Air handling, and customs Clearance including duty drawbacks, 3PL/warehousing, and customized routing.

3 FOOD

We manage temperature-sensitive food suppliers across the U.S., adhering to complex FDA and USDA regulations, including HACCP, FSVP, and temperature control. INSIGHT offers freight solutions to meet these requirements for food items.

4 COSMETICS

We specialize in transporting and handling delicate beauty products, such as skincare and cosmetics in liquid and cream forms. Proper storage and transportation are vital to maintaining the quality of these perishable items. Our experts provide tailored solutions to ensure their safe handling and distribution.

5 ELECTRONICS

We excel in managing delicate and valuable electronic components, tackling the distinct logistics challenges of the high-tech industry. A key priority is implementing stringent security measures to meet the specific standards and needs of the electronics sector.

6 MEDICAL DEVICES

For medical devices, we offer specialized handling, including temperature-controlled transit, storage, and custom packaging. Since even minor damage can impact their performance, our team focuses on tailored solutions to guarantee safe and uncompromised delivery, fully meeting client requirements.

7 MACHINERY

Machinery transportation is met with critical challenges such as intricate delivery and specialized transport with the ability to handle overweight shipments.

Our team of experts provides consultation with clients to ensure a smooth operational procedure until the final transit.

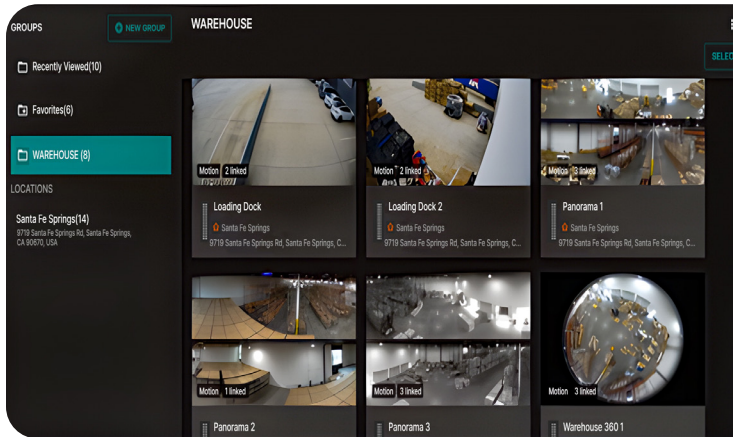

8 DANGEROUS GOODS

Spanning from truck drivers to members of the operations team, Insight provides specialized training to manage cargo susceptible to possible combustion, contamination, or immediate spoilage. Our utmost concern is the safety and security of our clients' DG cargo and with our commitment, we can provide ensured delivery without compromise.

SECURITY >

- 30 multi-angle cameras
- 24/7 dedicated solution
- Real-time monitoring & motion detection system
- Immediate notification to the local authority upon motion detection

WHY INSIGHT? >

Insight Logistics offers fulfillment services that take care of the entire order process for customers, whether online or offline, and provides smart systems that allow you to see the entire process from start to finish.
